## SASB REPORTING FOR BUNZL'S SUSTAINABILITY METRICS

The Sustainability Accounting Standards Board ('SASB') has industry-specific sustainability standards which identify material topics and associated metrics. The table below summarises where relevant SASB disclosures can be found throughout Bunzl's annual reporting. This is based on several standards from the materiality map as Bunzl does not fall within one clear sector. We have based our disclosure on the most relevant standards for the business that align to and cover the key sustainability themes arising from our recent materiality assessment. All of the data provided below is from 2023 unless otherwise stated.

SASB Metric	Bunzl Disclosures
Product lifecycle management	
Revenue from products that are reusable, recyclable, and/or compostable	In 2023, £2.2bn revenue was generated from packaging and products made from materials that are recyclable, compostable, reusable or made from renewable sources.
Discussion of strategies to reduce the environmental impact of packaging throughout its lifecycle	We have discussed how we work with our suppliers and customers to reduce the environmental impact of packaging and products in both our Annual Report and Insight Series presentations.  Pages 56 to 57.  CE Insights series pages 23 to 24.  BNA Insights series pages 13 to 18.

### **Greenhouse Gas Emissions**

Gross global Scope 1 emissions

Discussion of long term and short term strategy or plan to manage Scope 1 emissions, emissions reduction targets, and an analysis of performance against those targets

89,806 tonnes of CO2e

Our climate change/carbon strategy has been detailed in the sustainability section of our Annual Report on pages 48 to 55.

A comprehensive view into how we understand, assess and manage the risks and opportunities associated with climate change can be found in our TCFD index and associated reporting. Pages 48 to 55.

Our integrated process for identifying and assessing risks is detailed in the strategic report section of our Annual Report on pages 68 to 76.

Our carbon reduction targets can be found on pages 48 to 49 of our Annual Report with our performance shown on pages 52 to 53.

The targets are (baseline year: 2019):

- Scope 1 & 2 50% more carbon efficient (equivalent to a 27.5% absolute reduction by 2030)\*
- Scope 3 79% of suppliers by emissions will have science-based targets by 2027\*
- Scope 1, 2 & 3 90% absolute reduction in emissions by 2050
- Net zero emissions by 2050 at the latest

We have committed to the Business Ambition for 1.5°C initiative & Race to Zero campaign. We have submitted our Net Zero plan to the SBTi for approval in 2023.

\* These targets have been approved by the Science-Based Targets Initiative (SBTi).

#### **SASB Metric Bunzl Disclosures**

### **Greenhouse Gas Emissions**

- (1) Total fuel consumed, (2) percentage natural gas, (3) percentage renewable
- (1) Total fuel consumed: 1,442,669 GI
- (2) percentage natural gas: 24%
- (3) percentage renewable fuel:1.3%
- (1) Operational energy consumed. (2) percentage grid electricity, (3) percentage renewable
- (1) Operational energy consumed: 1,776,617 G
- (2) percentage grid electricity: 18%
- (3) percentage renewable: 5.7% (total energy), 25% (total electricity)

# Labour conditions in the supply chain

Percentage of (1) Tier 1 supplier facilities and (2) supplier facilities beyond Tier 1 that have been audited to a labour code of conduct, (3) percentage of total audits conducted by a third-party auditor

Our auditing process is our first line of defence to prevent defective products being shipped and to ensure products comply with our ethical standards.

- (1) Tier 1 suppliers: All products supplied directly from Asia are through suppliers that are verified by our Global Supply Chain Solutions team and our audits typically cover c.98% of Bunzl spend across 13 Asian countries every two years. We will take a proactive, risk-based approach to responsible sourcing, identifying common issues in our supply chain and working closely with suppliers to reduce the future incidences of these. The spend coverage above (representing c.15% of our global supply chain) relates to our suppliers based in regions identified as very high risk in international rankings of human rights issues (e.g. Global Slavery Index).
- (2) Tier 2 suppliers: None audited as we are taking a risk based approach to working through our supply chain with our programme (and focusing on Tier 1 as a priority). Our audits and Supplier Code of Conduct demand that our Tier 1 suppliers ensure that the Code is maintained and enforced within their own supply chains, including by any sub-contractors used in executing any orders received from our Company.
- (3) Percentage of total audits conducted by a third-party auditor: 16%.

For more information see:
